TECHNICAL SKILLS

Cloud — AWS

EC2 · S3 · IAM · VPC · EKS · ECR · RDS · Lambda · CloudWatch · SageMaker · Bedrock · Auto Scaling · Load Balancing

CI/CD & Automation

Jenkins · GitHub Actions · Git / GitHub · Pipeline-as-Code · Bash

Containers & Orchestration

Docker · Docker Compose · Kubernetes · Helm · Amazon EKS

Infrastructure as Code

Terraform · CloudFormation

MLOps

MLOps Pipelines · DVC · Airflow (ETL) · Model Serving · Monitoring

Monitoring & Security

Prometheus · Grafana · CloudWatch · Trivy · SonarQube · IAM

Languages & Data

Python · SQL (MS SQL) · Linux · YAML · REST APIs

EDUCATION

BS Computer Science

FAST-National University of Computer and Emerging Sciences, Islamabad

09/2021 – 06/2026 · CGPA 2.97/4.00

Relevant Courses

DevOps, MLOps, Cloud Computing (AWS), Database Systems, Data Mining, Deep Learning, Parallel & Distributed Computing, Artificial Intelligence, Stat Modelling

SALESFORCE DEVELOPER

Trailhead by Salesforce

- Completed Trails: 9+
- Salesforce AI Associate certificate

PROFILE

Computer Science graduate specializing in **DevOps, MLOps and AWS cloud engineering**. Builds end-to-end CI/CD and MLOps pipelines on AWS, containerizes workloads with Docker, orchestrates them on Kubernetes, and provisions whole environments with Infrastructure as Code — run one script and the machines are created and started. Delivered a **GenAI project with full MLOps on AWS** and a **Netflix-clone deployed through complete DevOps pipelines**.

KEY PROJECTS

GenAI Application on AWS with End-to-End MLOps

AWS · SageMaker · Docker · Kubernetes · CI/CD · DVC

- Built a Generative AI application on AWS and applied a complete MLOps lifecycle: data versioning, training, packaging, deployment and monitoring.
- Automated build, test and deployment of the model service through CI/CD pipelines and Docker containers.
- Provisioned the cloud infrastructure with Infrastructure as Code for repeatable, consistent environments.

Netflix Clone — Complete DevOps Pipeline on AWS

Jenkins · GitHub Actions · Docker · Kubernetes · Terraform · AWS

- Deployed a Netflix-clone application through a full DevOps pipeline from code commit to production release on AWS.
- Built CI/CD workflows that automatically build, scan, containerize and push images to a registry.
- Orchestrated the app on Kubernetes and provisioned compute, networking and access control as code, with monitoring and logging for cluster health.

Infrastructure as Code Automation Toolkit

Terraform · AWS · Bash

- Wrote reusable scripts that create and start complete machines and environments on AWS automatically, removing manual console setup.
- Standardized configuration across environments to cut setup time and configuration drift.

OTHER PROJECTS

Integrated Test Automation Solution (ITAS)

Test Automation · Reporting Dashboard · SQL

- Built a test automation lab solution that streamlines and scales test processes.
- Designed a reporting dashboard aggregating data across corporate portals and mobile devices.

CERTIFICATIONS

Salesforce Trailhead & Coursera (20+) certificates, including:

- **Specialization in MLOps** — DeepLearning.AI & Stanford University (Coursera)
- **Copado for DevOps** — Salesforce CI/CD, version control and automation
- **Salesforce AI Associate** — Trailhead
- Salesforce Platform Developer Trail (Basic, Intermediate & Advanced)
- Introduction to Git and GitHub (Coursera)
- Introduction to Agile Development and Scrum (IBM, Coursera)
- Foundations of Project Management (Google, Coursera)
